Docket #E-00000XX-13-0214

November 13, 2014

ORIGINAL

Dear Corporation Commissioners,

I am an APS customer. Last year, I participated in the APS Home Energy Checkup, using Cozy Homes (Eli Chamberlain) to do the work. Without the help of the rebates, I could not have afforded the energy saving steps, which turned our home from a leaky, energy wasting house to a warm, cozy, more energy efficient home. Our energy costs have gone way down.

Please, support the Energy Efficiency Standard that has been so important in creating and implementing these energy efficiency programs. Ending these programs will hurt our states sustainable future, job growth and energy independence. Please keep these valuable programs around for future rate payers like myself.

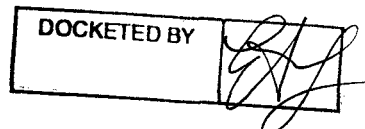

Sincerely,
Liza von Rosenstiel and Phil Pearl
